

eco-growth
A new perspective on waste

Manure to Energy

Reduce your manure waste by up to **70%** and turn it into renewable energy

Optimizing Your Manure Waste

As an expert in delivering Waste-to-Energy solutions, Eco-Growth is committed to leaving a clean legacy. We partner with clients to create a world where all people can pursue opportunities without waste.

We're as passionate about your business as you are. Whether it's a livestock operation or equine business, chances are you face challenges with the proper handling and storage of manure. With its innovative patented technology, the Eco-Growth Organic Reactor (EGOR™) transforms raw manure waste into a significantly lighter and parasite-free substance that can be utilized as a biofuel with a high BTU value.

Reducing costs and eliminating disease carrying contaminants associated with the disposal or long-term storage of manure not only benefits your operation but allows you to meet your HSE objectives.

Get the most out of your waste and contact us today.
